

1iam Token

The One In A Million Globe unique personalised token for NFT conversion

White Paper (version 1.8)

20 December 2021 Authored by William Rabbitt

-
- ✿ 1iam is an Tokel utility token that is designed to be used for the purchase a One In A Million NFT option on the One In A Million Globe using Tokel blockchain cutting edge technology.
 - ✿ The total supply of 1iam has been fixed at 1,000,000 tokens.

1. Introducing 1iam

The aim of the 1iam program allows users to purchase a spot on our unique Globe and create a personalised NFT linked to that spot of which there will only ever be 1 million.

This is a novel opportunity to create something unique and personal for a special, person, place or location

2. 1iam Anatomy.

The 1iam token is a fungible cryptographic token that will exist on the Tokel smart chain. A fungible token is an asset that is interchangeable with tokens of the same type, so that one 1iam token always has the same value and properties as any other single 1iam token. 1iam is the utility token used to secure a spot on The One In A Million Globe and conversion of the unique created product to a NFT. The 1iam token will be burnt once it is used to reserve a spot on the globe.

3. Token Economy

3.1 1iam Allocation

20% are initially allocated to development of the globe. 5% for Legal 10% Marketing, 30% Team 10% Founders and 25% will be set aside for rewards and mining all unused tokens go to the team.

3.2 Token Creation

The 1iam token was minted in January on the Tokel Platform just 1 million 1iam tokens were minted

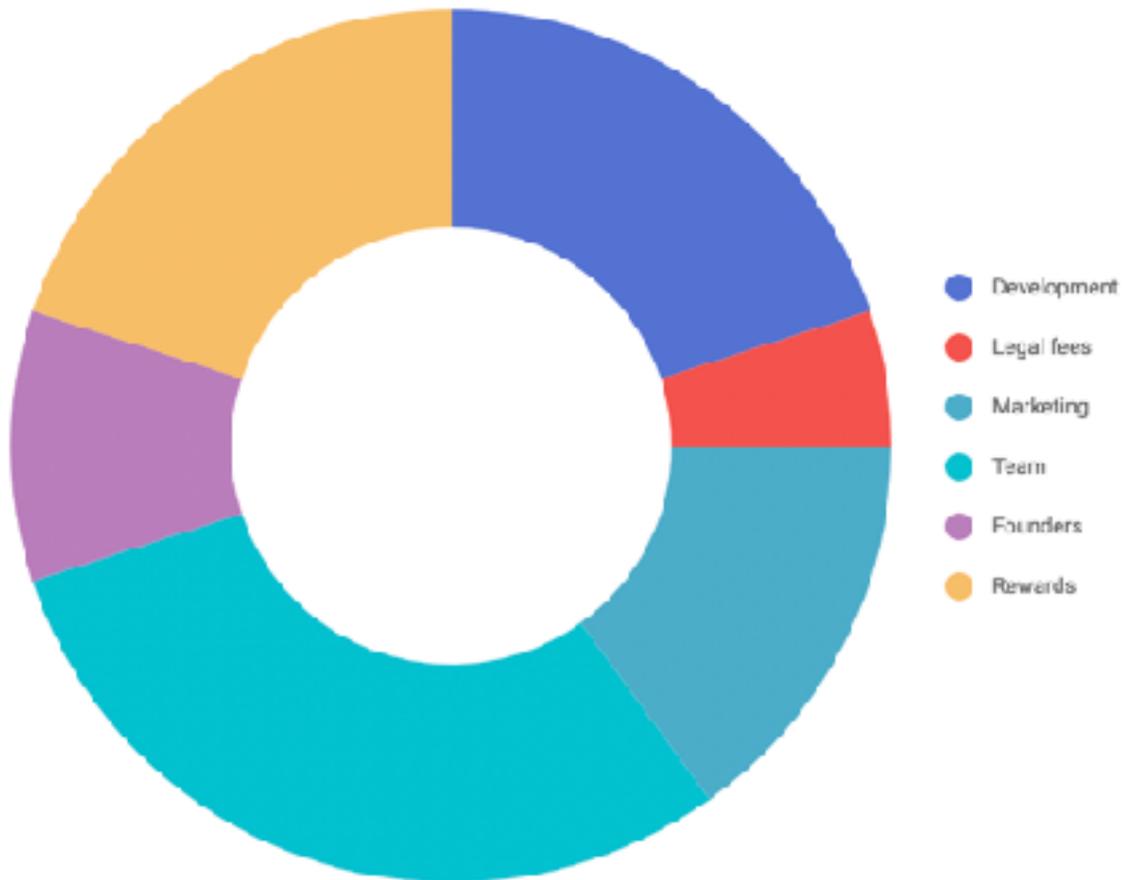

3.2 Token release 1st quarter of 2022,

- **Seed Round**, 10,000 tokens at \$5 that's a discount of \$25 anyone can purchase tokens from the Tokel Dex and the investment raised will be used to develop out the project. **Note no liquidity pool is created at this point.**
- **Round 1.** 100,000 tokens at \$8 that's a discount of \$22, we plan to run Crowdfunding event, anyone can participate in the offering by staking their capital. Once the Crowdfunding ends, all participants claim the tokens proportional to their shares of the pool. Any difference between the amount participants staked and the actual cost of the tokens (i.e. initial price * the number of tokens actually received) is then refunded back to participants.

- **Round 2.** 110,000 tokens at \$15 that's a discount of \$15 again we plan to use a Crowdpooling event, how it works: anyone can participate in the offering by staking their capital. Once the Crowdpooling ends, all participants claim the tokens proportional to their shares of the pool. Any difference between the amount par-

participants staked and the actual cost of the tokens (i.e. initial price * the number of tokens actually received) is then refunded back to participants.

- **Round 3.** 110,000 tokens at \$30 again a Crowdpooling event, how it works: anyone can participate in the offering by staking their capital. Once the Crowdpooling ends, all participants claim the tokens proportional to their shares of the pool. Any difference between the amount participants staked and the actual cost of the tokens (i.e. initial price * the number of tokens actually received) is then refunded back to participants.
- Auction, The remaining 20,000 tokens will be auctioned with a reserve of \$100.

Discount Rates

Pre-Sale

Price \$5

Unsold tokens from previous rounds will be moved into the next round. The token sale will automatically go to the next round when tokens are sold out in the prior round.

4. Liquidity Protection

There is also a liquidity protection period during crowdpoling events to prevent the project the publics investment.

The bid-side liquidity is established by proceeds from Crowdpoling participants, and the ask-side liquidity is established by tokens reserved for the pools from Crowdpoling. This initial liquidity belongs to creator of this Crowdpoling campaign, but the creator cannot remove this liquidity during the liquidity protection period.

After the Crowdpooling phase ends, new public liquidity pools will be automatically set up with the capital raised and the tokens reserved for ask-side liquidity from step 1 and trading becomes available. The starting market price is the initial offering price from step 1. At this point, we also add a pre-deposit settlement mechanism, liquidity protection mechanism, and support for flexible fee configuration.

Anyone is able to provide liquidity to these pools AMM-style, with the added benefit of higher capital efficiency thanks to PMM.

This resulting spot market follows the bonding curve method: when a trader buys tokens, the token price goes up; when a trade sells tokens, the token price goes down.

5. 1iam Community Overview

5.1 Social activity Development strategy

The 1iam Token platform is currently focused around an audience that uses English as the common language, with plans to support additional languages as the project grows.

5.2 Current growth and distribution strategies of 1iam

- Partnering directly with well-known influencers in the crypto world
- Partnering directly with Tokel Dex fo deployment
- Sell 1iam tokens to launch the platform

5.4 Community and social channels as of 1st September 2021

1iam Telegram Community 1iam Twitter 1iam discord

7. 1iam Roadmap.

1st quarter 2022

MVP Globe starts spinning. Minimum viable product launched allowing user to view the standard NFT, token.

Seed Round sale February 2022.

Round 1 will take place 2 weeks after seed round.

Round 2 will take place 2 weeks after round 1.

Round 3 will take place 2 weeks after round 2.

Auction will take place 2nd quarter of 2022.

1st quarter 2022

Reserve your geo-location on the . Allowing you to enter and reserve a geo-location with two options 1. create our standard NFT(Included in token purchase) or hold to add a custom NFT to your reserved location.

2nd quarter 2022

3D globe . The Version 2, the 3D version of the Globe goes live allowing people to view all NFT” created

Once all tokens are sold a New master NFT will be commissioned to be auctioned to raise funds for the communities next project. Holders of the tokens, NFT’s or reserved location on the globe will be invited to vote on which projects to invest in and the profits from the investments will be shared between them.
